Heating systems are comprised of a heater core which acts like a little radiator behind the dash, fan, and hoses which draw the heat from the engine to the core. Auto A/C systems operate similarly, by delivering coolant to the fan to blow cold air in the cabin. Clifton Park, NY Auto A/C & Heating System Repair Service. Why Auto A/C & Heating ...

The Haynes Automotive Heating & Air Conditioning Systems ...

The heater in your car is basically a smaller version of your cooling systems radiator. Hot engine coolant is circulated through a small radiator, often times called a heater core. A fan is positioned in front of the heater core to blow cold outside air over the fins. As this air travels over the heater core, it heats up and becomes the hot air which blows out your heater vents.

Best 30 Heating And Air Conditioning in Schenectady, NY ...

All automotive air conditioning systems are (nearly) closed loops with a high-pressure side and low-pressure side. We'll start with the high-pressure side as it leads from the engine to the passenger compartment: Compressor: The compressor is a pump driven by a belt attached to the engine's crankshaft. When the refrigerant is drawn into the compressor, it is in a low-pressure gaseous form.

How a Car Air Conditioning System Works? - Nicely ...

There has been much debate on the effect of air conditioning on the fuel efficiency of a vehicle. Factors such as wind resistance, aerodynamics and engine power and weight must be considered, to find the true difference between using the air conditioning system and not using it, when estimating the actual fuel mileage. Other factors can affect the engine, and an overall engine heat increase can affect the cooling system of the vehicle.

Automotive Heating and Air Conditioning (Automotive ...

North Troy, New York Auto Air Conditioning Repair Service. Why service is important: Heating and A/C systems can easily wear out eventually with use, hose pipes could obstruct and leak otherwise serviced, causing inadequate efficiency or an absence of heating and cooling potentials.
