The system is designed to provide safety and satisfaction, as well as reliable results to ensure proper patient outcomes.

COLOR CODES OF VACUTAINER TUBES AND ITS USES

Download Ebook Bd Vacutainer System Tube Guide

A Vacutainer blood collection tube is a sterile glass or plastic tube with a closure that is evacuated to create a vacuum inside the tube facilitating the draw of a predetermined volume of liquid. Most commonly used to draw the blood samples directly from the vein. These tubes can also be used sometimes for the collection of urine samples.

BD Vacutainer Venous Blood Collection Tube Guide

BD Vacutainer® Tubes are used to transport and process blood for testing serum, plasma or whole blood in the clinical laboratory. PRODUCT DESCRIPTION BD Vacutainer® Tubes are evacuated tubes with color-coded (see table below) conventional stoppers or BD Hemogard™ Closures. BD Vacutainer® Plus Tubes are plastic tubes. Most tube types contain additives in varying concentrations dependent upon the amount

Vacutainer - BD

IMPORTANT MIXING GUIDELINES All BD Vacutainer® tubes require immediate mixing following collection. Insufficient mixing can result in inaccurate test results and the need to re-draw. Correct mixing technique is to gently invert (180° and back) each tube the recommended number of times shown on the right hand side

of the table.
