As with the two remotes that come with the Denon AVR-4308ci, I'd recommend putting them back in the box and investing in a Logitech Harmony One. The Denon remotes are ok at best, and I wanted a remote that the whole family could use with ease. The manual is a bit better than past Denon manuals, but there's still lots of room for improvement here.

While the Denon AVR-4308CI is not the first receiver to integrate TCP/IP into its design, it has made some of the best use of network features in a traditional A/V device that I have used. From control functions to media server-type features, Denon has really added some value by allowing you to put this unit on your home network. Next to overall performance, this set of features is what sets the AVR-4308CI apart from the competition.

This is the least expensive Denon that uses full hdmi switching including audio. Many of the receivers in the \$500 range from yahama and pioneer don't. Don't buy them. Setting up components with HDMI out (most new equipment does this) is a breeze. Setting up the audio profile was a breeze with the auto set up.
