Logical and Critical Thinking - Online Course

Logic is the science of how to evaluate arguments and reasoning. Critical thinking is a process of evaluation which uses logic to separate truth from falsehood, reasonable from unreasonable beliefs. If you want to better evaluate the various claims, ideas, and arguments you encounter, you need a better understanding of basic logic and the process of critical thinking.

Introduction To Logic And Critical

We begin, in the first week, with an introduction to logical and critical thinking and common obstacles and fallacies. In week two Patrick introduces arguments. We learn to identify premises and conclusions – components of a good argument – and by the end of this week we’ll be able to construct an argument in standard form.
