## **Amazon.com: Patterns In The Mind: Language And Human ...**

Jackendoff proposes a physiological basis for language in a specialized area of the brain, which can be identified even though its organization is still a mystery. He then extends these principles of universal grammar and innate knowledge to the understanding of music, visual signs, and, most challenging, social interaction. Meaning is ``constructed" by the innate patterns of the auditor as well as by the speaker, he says, and, by extension, human experience of the world is ``constructed by
