trixbox CE is an easy to install, VOIP phone system based on the Asterisk PBX. trixbox is designed for home or office use. trixbox CE includes CentOS linux, mysql, and all the tools needed to run a business quality phone system.

### **Download PBX in a Flash 5 - VoIP-Info**

Download the PBX in a Flash 1.3 ISO file. Attach the ISO to the virtual machine's CD-ROM drive and boot the machine. At the first install prompt, type ksalt. This starts the install in text mode, which avoids the issue with the 24-bit video. It also does not use the LVM file system, which apparently adds unnecessary overhead (according to jroper). I deliberately chose a very simple root password during the setup so I could take this virtual machine to client sites one day if needed.
